**MORE SILENT AIR**

# System air conditioning ducted air single and multi-zone: **MORE SILENT AIR**

## **MORE SILENT AIR**

MORE SILENT AIR ducted air conditioning system is designed to ensure optimal comfort with very little noise disturbance. Thanks to the integrated multi-zone management system and the use of multi-fans, it is possible to control the different climate zones separately. The system operates through precise control of airflow in each room, offering significant benefits in terms of living comfort. All this allows also optimize energy efficiency. Suitable for new construction and redevelopment.

# Optimal comfort, energy efficiency

The **MORE SILENT AIR** system is distinguished by its high technological content, which ensures extremely quiet operation, perfect for even the most demanding home environments such as bedrooms.

MORE SILENT AIR ducted air conditioning systems are equipped with centrifugal fans, each with an independent motor for each room, thus ensuring precise and customized control. Thanks to Inverter technology, these devices not only achieve a very high level of comfort and well-being, but also do so with reduced energy consumption. This means you can enjoy an ideal climate in every room of your home without worrying about energy costs.

The combination of quietness, energy efficiency and comfort makes MORE SILENT AIR the ideal choice for those seeking the best for their homes.

# MORE SILENT AIR

# What it is MORE SILENT AIR

**MORE SILENT AIR** is a ducted air conditioning system that combines comfort, energy efficiency and quietness. Available in MONOZONE and MULTIZONE versions, it enables precise temperature control, adapting to the needs of each room. Thanks to centrifugal fans with independent motors and Inverter technology, **MORE SILENT AIR** offers optimized airflow, reducing consumption. Its compact design makes it ideal for discreet installations, improving living comfort without altering the aesthetics of spaces.

# Why MORE SILENT AIR

Choosing **MORE SILENT AIR** means relying on an intelligent, state-of-the-art air conditioning system; in combination with MORE radiant systems, it provides a complete and optimal level of comfort during the summer season. Its technology ensures low consumption, while self-regulating fans ensure optimal comfort and quiet operation. Advanced management of the multi-zone version allows each room to be controlled individually, even remotely, for a personalized experience. Perfect for new construction and upgrades, **MORE SILENT AIR** is the ideal choice for those who want maximum comfort without compromising on efficiency and design.

# MORE SILENT AIR MONOZONA

## **MORE SILENT AIR MONOZONE**

The single-zone version of MORE SILENT AIR air conditioning systems is ideal for those seeking a simple and effective solution for controlling climate in a single area.

Due to its versatility, it can be installed either inside the suspended ceiling or through a counterwall. This system uses centrifugal fans to ensure even and quiet airflow.

Perfect for new construction and upgrades, the single-zone system offers optimal comfort and high energy efficiency while maintaining a quiet and comfortable environment.

## **ADVANTAGES**

- Effective solution for room climate control
- Uniform airflow and extremely quiet operation
- Inverter technology to reduce energy consumption
- Compact design to blend seamlessly into any environment
- Flexible installation in false ceiling or wall mount
- Suitable for new construction and renovation
- Possibility of remote management via App and Wi-Fi
- Integration with MORE SET systems for smart control, with the possibility of remote management via App and Wi-Fi

# MORE SILENT AIR MULTI-ZONE

## **MORE SILENT AIR MULTI-ZONE**

The multi-zone version of MORE SILENT AIR air conditioning systems integrates an advanced management system that allows you to control the different climate zones within a building separately. Through the use of multi-fans, it is possible to regulate the air flow precisely in each zone, ensuring personalized comfort and optimal energy efficiency.

This solution is particularly suitable for rooms with different different climates, offering total control and superior comfort.

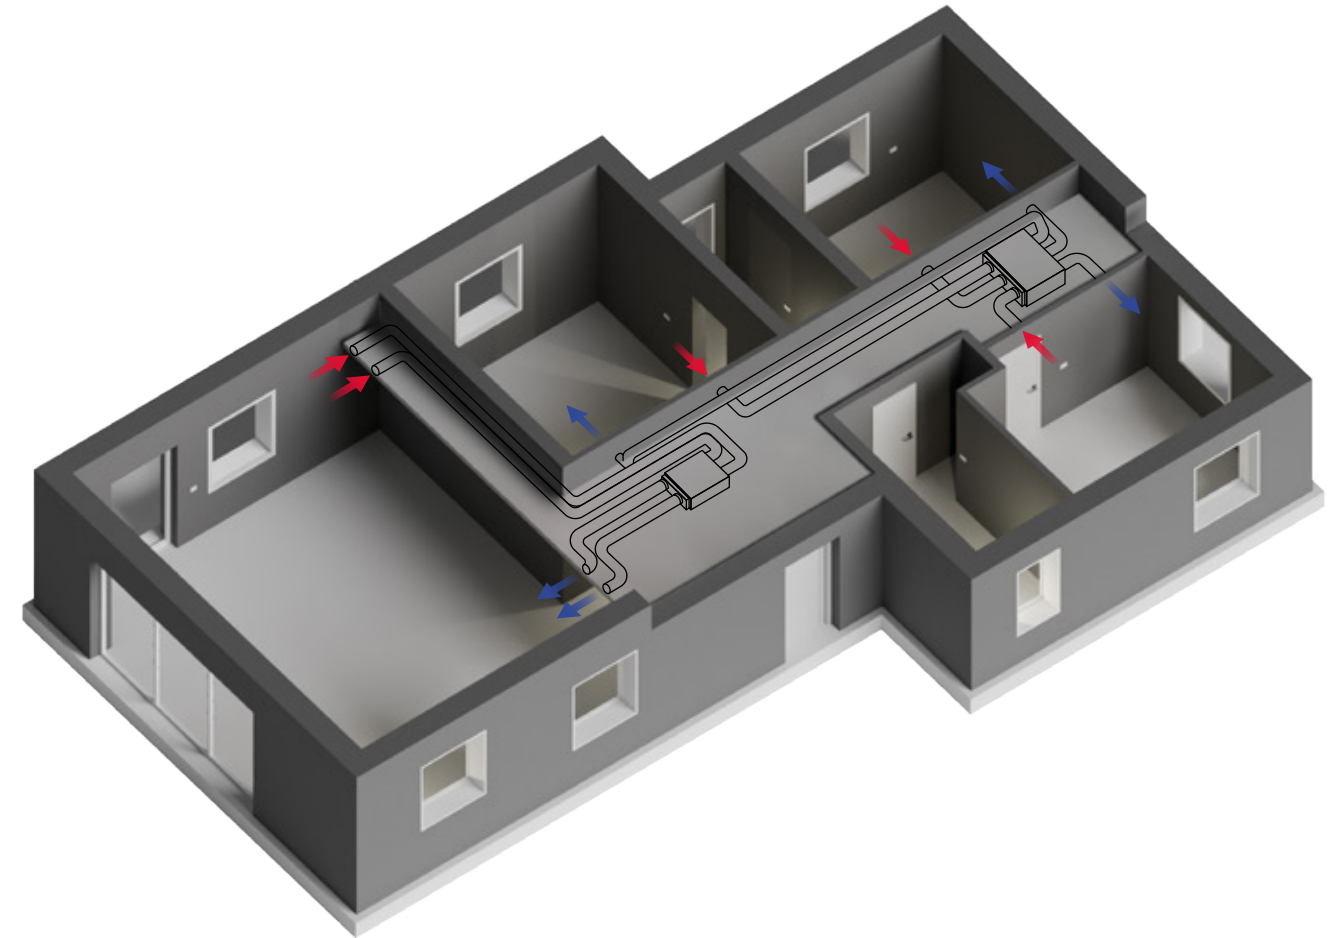

## **ADVANTAGES**

- **Independent control of multiple rooms with advanced management**
- **Brushless centrifugal fans for greater efficiency and quietness**
- **Precise airflow adjustment for each zone**
- **Compact design, perfect for meeting diverse needs**
- **Integration with MORE SET systems for intelligent control**
- **Possibility of remote management via App and Wi-Fi**
- **Integration with MORE SET systems for smart control, with the possibility of remote management via App and Wi-Fi**

# Zones with autonomous thermal control

**MORE SILENT AIR** enables advanced multi-zone control, supporting the use of 2 to 5 fans. Each zone and its fan can be individually adjusted, even remotely. The installation can be configured for a single outlet per zone or for a zone with multiple outlets.

# An intelligent system

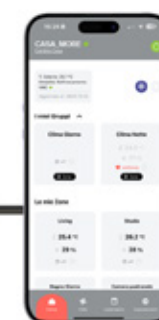

The MORE SILENT AIR system can be controlled through MORE SET BASIC and MORE SET EVO systems.

MORE SET BASIC is the simplest control system for managing your home's temperature. It can be configured as a traditional thermostat with one or two set points (comfort / economy) or as a chronothermostat with weekly hourly programming.

The MORE SET BASIC system can be managed remotely via the dedicated control app available on the App Store (iOS) and Google Play (Android).

MORE SET EVO offers simple and intuitive technology to monitor and adjust MORE systems and Wellbeing indicators: temperature (°C), humidity (%) and air quality (PPM). Environmental parameters collected by room probes are analyzed by a proprietary algorithm, which acts on the actuators, allowing the desired level of well-being to be maintained and optimizing efficiency and energy savings.

The MORE SET EVO system is compatible with leading home automation systems, has retractable probes that can be integrated into any civil series, and can be fully managed remotely via the control app "MORE Wellbeing Control," available on the App Store (iOS) and Google Play (Android).

Wellbeing Control

# Compact and slim design

The minimalist design and the variety of available sizes make it possible to optimize the use of space: MORE SILENT AIR is therefore easy to conceal, leaving the aesthetics of the room untouched.

# MORE INVISAIR

**MORE INVISAIR** is the revolutionary range of aesthetic diffusers that transforms ventilation into a living comfort experience and a new design dimension. Elegant, functional and silent solutions designed to integrate perfectly into any space, from renovations to new construction, without ever sacrificing aesthetics.

## PLUS

- Architectural integration
- Elegant and discreet design
- Versatility of installation
- Efficiency
- High-quality materials
