

# MORE SET EVO

**MORE SET EVO**

# Integrated climatic regulation, supervision and wellbeing control system

## **MORE SET EVO**

is the *Deus Ex Machina* of climatic wellbeing: a single integrated and centralized intelligence that, through detection probes of the main indoor environmental parameters, allows supervision, control and optimal management of climatic Wellbeing. Thanks to state-of-the-art technology and easy-to-use devices, comfort within environments can be quickly restored, ensuring a unique and personalized experience for each user.

# Regulation and control system of climate Wellbing

APP MORE Wellbeing Control

# What is MORE SET EVO?

MORE SET EVO is the system for advanced thermoregulation, capable of fully managing the air conditioning system for winter and summer seasons, ensuring optimal and efficient climatic comfort.

Equipped with room probes integrated into the electrical system, the system enables precise and constant monitoring of indoor climatic conditions.

Designed to be user-friendly and high performance, MORE SET EVO supports remote management and supervision, significantly reducing the need for manual on-site interventions. Its elegant and exclusive design integrates seamlessly with the main built-in civil electrical series.

# Why MORE SET EVO?

The MORE SET EVO control system is proposed as excellence in system management and living comfort. It is characterized by ease of use and an elegant design that integrates with the main built-in civil electrical series. MORE SET EVO is always present and attentive in the management of home climate control.

**EFFECTIVE: ensures the highest level of living comfort, adapting to the needs of any environment.**

**EFFICIENT: the use of the minimum resources necessary to achieve significant energy savings.**

**SIMPLE: a system that is simple to install and adjust, allowing home control even remotely.**

# Advantages

## FOR PROFESSIONALS

- Simplicity and security in planning and budgeting
- Simplicity in installation
- Flexibility in programming during startup
- Possibility of remote supervision of systems by MORE technicians

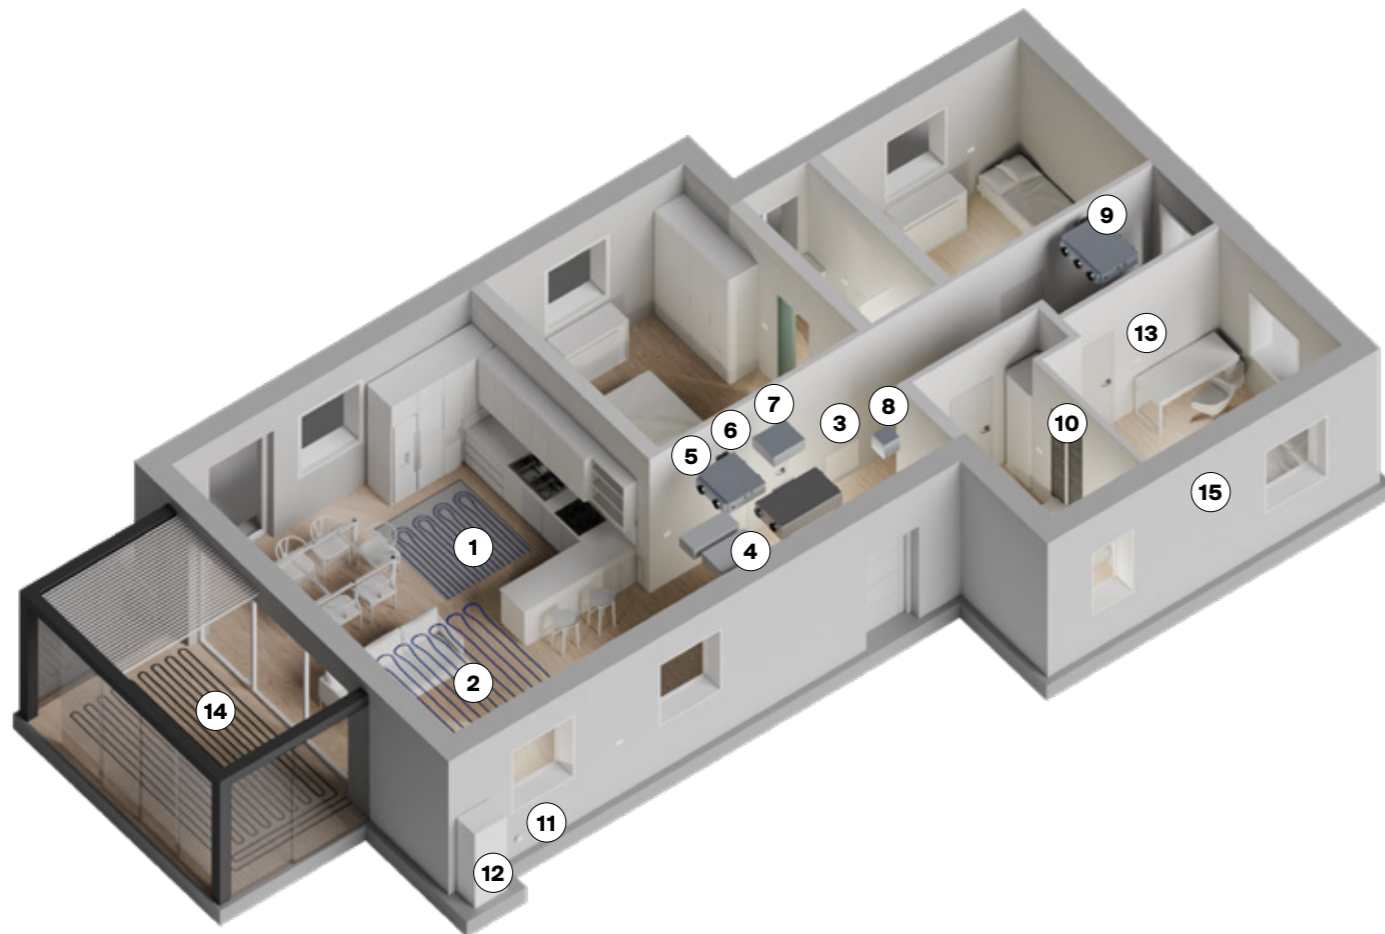

## FOR THE USER

- Single interface for the entire system
- Simplicity in system programming and management via color interface of touchscreen displays or via MORE APP, with easy access to programming of:
  - Operating hours on two regimes (Wellbeing/Energy Saving)
  - Desired temperatures for each zone, differentiated by comfort and economy
  - Humidity levels for zones equipped with T/H sensors
  - Ability to manually set operation for individual zones or groups
  - Seasonal change between summer and winter
- Dedicated MORE APP for local and remote management of all functions
- Possibility of remote supervision of systems by MORE technicians

## FOR COMFORT AND ENERGY EFFICIENCY

- Implementation of advanced logic for the management of mixed circuits
- Optimization of the management of generators
- Optimization of activation schedules according to climatic conditions
- Designed to automatically prevent surface condensation phenomena in radiant cooling systems, while maintaining system performance at the highest possible levels by progressively shutting down zones that exceed the dew point
- Management of mixed systems, such as those combined by radiant and fan coil, offering high versatility of use

# Key features of the system

MORE SET EVO controls and manages all air conditioning systems, including:

- Control of up to 32 zones, determining temperature and humidity set points
- Management of up to 8 hourly programs with different daily time slots
- Management of up to 8 circuits, direct and/or mixed
- Control of up to 8 dehumidifiers, with dew point management
- Comprehensive monitoring of multiple heat sources (boiler, heat pumps, etc.) and external signals

- ① MORE FTA radiant floor system
- ② MORE FTAs wall/ceiling radiant system
- ③ MORE ZONE distribution system
- ④ MORE VMC air renewal system
- ⑤ Dehumidification system MORE DEU
- ⑥ Rapid climate comfort regulator MORE DEA Humidification system
- ⑦ MORE UMI Humidification System
- ⑧ MORE Air Fragrance scent diffuser for ducted systems
- ⑨ Multi-zone ducted climate control system MORE SILENT AIR
- ⑩ MORE PAD electric radiant system
- ⑪ MORE STOP LEAK micro water leak detection system
- ⑫ Heat pump
- ⑬ Sensors for the detection of Wellbeing indicators MORE ENVIRONMENTAL PROBE
- ⑭ Electric radiant system for non-ordinary environments MORE FTA-e
- ⑮ Outdoor probe

# Components

The MORE SET EVO system consists of:

- Basic control unit
- Touch screen control panel to be installed on the wall in the room, to set user parameters
- Passive room temperature sensors
- Active temperature and/or humidity room sensors, with or without LED display
- Air quality sensors (VOC)

## **BASIC CONTROLLER**

The MULTIZONE preconfigured electronic controller (up to 32 zones) is the heart of the system, where all system parameters are set and where data are processed, thanks to temperature, humidity and air quality detection sensors.

- REG DIN central unit, 6 DIN rail modules
- Expandable, with the different modules available, to adapt to more or less complex systems
- Heart of the system, oversees all control functions by interfacing through digital and analog inputs and outputs
- BUS connections with expansions and room sensors
- Display with menu indications
- Password levels for different accesses

# Components

## MORE SET TOUCH

Flush-mounted touch screen control panel designed to be compatible with the most common flush-mounted civil series. Thanks to the simple and intuitive color LCD display, you can view information and change system parameters:

- Working mode (Wellbeing/Energy Saving/Off)
- Temperature and humidity setpoint change for each zone
- Setting of hourly schedule for each day of the week

REMOTE TERMINAL FOR  
INTERFACING MORE SET EVO  
CONTROLLERS, SUITABLE  
FOR COORDINATED INSTALLATION  
WITH POPULAR BUILT-IN  
CIVIL SERIES

## MORE SET TOUCH 2.0

Wall-mounted touch screen control panel designed to be compatible with the most common built-in civil series. With the simple and intuitive color LCD display, you can view information and change system parameters:

- Working mode (Wellbeing/Energy Saving/Off)
- Temperature and humidity setpoint change for each zone
- Hourly schedule setting for each day of the week Equipped with built-in temperature and humidity sensors, and WiFi module for connectivity

TOUCH SCREEN DISPLAY WITH  
INTEGRATED WIFI FOR USE  
IN CONJUNCTION WITH  
MORE SET EVO CONTROLLER

# Components

## ROOM TEMPERATURE / TEMPERATURE AND HUMIDITY SENSORS / AIR QUALITY

All room sensors are installed in standard flush-mounted electrical boxes and are made in coordination with the civil series of leading brands.

This allows for maximum architectural and aesthetic integration of the MORE SET EVO system in the home.

- In TP (temperature only), TH (temperature and relative humidity) and VOC (air quality) versions, they offer high functionality
- Installable inside "503" boxes, they integrate perfectly with the main civil electrical series, with a discreet and elegant aesthetic effect
- Connection via BUS with serial address (active sensors)
- Connection via wire to analog input (NTC - passive sensors)

# MORE Wellbeing control

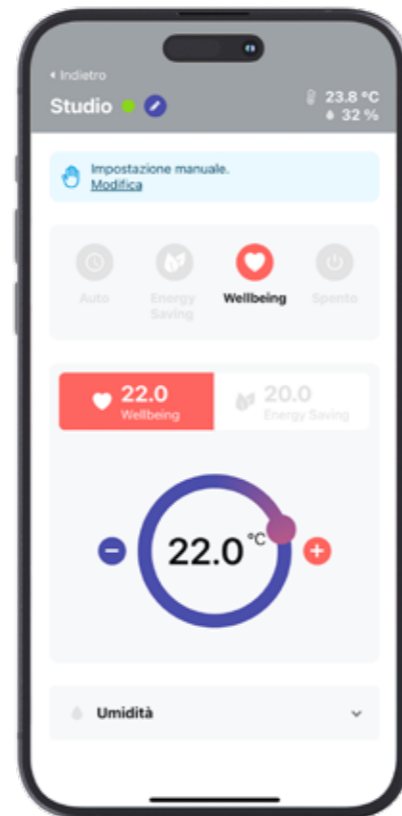

Scan the QR code to access the video tutorial of the MORE WELLBEING CONTROL APP

MANAGE AND CONTROL CLIMATE WELLBEING IN EVERY GROUP AND EVERY ZONE OF ALL YOUR HOMES, WHEREVER YOU ARE

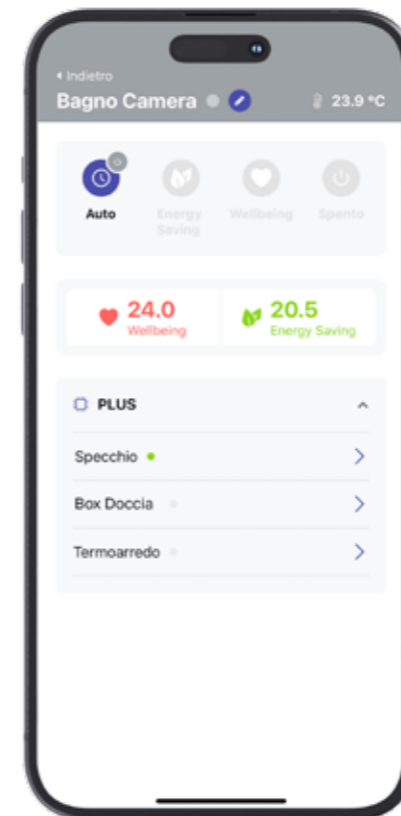

CONTROL AND MANAGE YOUR WELLBEING IN EVERY ROOM USING THE AUTOMATIC FUNCTION OR MANUALLY SETTING TEMPERATURE AND HUMIDITY

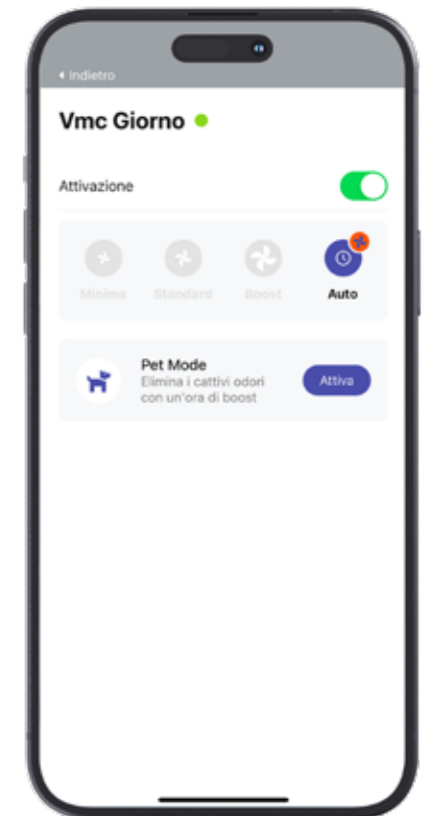

**MORE APP: WELLBEING CONTROL  
TAKE CONTROL OF YOUR WELLBEING.**

With MORE SET EVO and the MORE WELLBEING CONTROL app, complete control of your home is in your hands. Monitor, manage, and take real-time action on all installed systems through an intuitive interface for a smart and ultra-fast experience. Activate or deactivate individual systems or the entire setup from anywhere, and stay updated with push notifications that enhance efficiency and safety—making your home smarter than ever.

MANAGE AND CONTROL WELLBEING PLUS YOUR WAY, ANYTIME, FOR TAILOR-MADE COMFORT IN EVERY SEASON, INDEPENDENTLY FROM THE CLIMATE CONTROL SYSTEM

MONITOR YOUR INDOOR AIR QUALITY CHOOSE FROM 4 DIFFERENT OPERATING MODES OF THE MORE VMC SYSTEM. AND IF YOU HAVE A PET, YOU CAN ALSO USE THE PET MODE FUNCTION
